This system allows for greater accuracy of the actual players that played, in the past it was to hard to identify subs or changes, making the player qualifying list more accurate, and the detailed teams (which are auto generated) are also more accurate:- as scorers go directly to the club teams and physically update the correct players in the correct positions.

Players qualifying list consist off every player that has played what round and what Division.

The New Scoring system operates via a time Scale (3 Stages) of management

Stage 1

Mid-week Pennant:- Sunday Morning till Thursday Morning

Re shuffle of team after original Third was moved

How does the Auto Card Draw work

When the managers manually did the card draw they performed 2 draws
Which team would play each other and on what rink.

The matrix below shows the 18 different possibilities for the 3 rink draws.

The Auto Card draw in the CVBD scoring system does the following
 at the completion of Stage 1 (previous page) the software automatically
 performs a random selection from the Matrix 's 1 - 18 combinations.

This is done for each of the Division separately, once the selection
 from the matrix configuration is done the Score Cards and the Side manager
 sheets are manipulated to comply to the randomized draw

*In addition, prior to the Auto Card draw the teams as listed
 on teams sheets are also randomly shuffled*

Teams as entered on Team Sheets for the club are randomly shuffled prior to Auto Card Draw

	Division 3	Rnd 2	Echuca	Away
	Skip	Third	Second	Lead
Listed Team 1	Keith Brooks	Gary Williams	Robert Dick	Ken Willis
